EDUCATION

The University of Texas at Dallas — **Richardson, TX**
Master of Science, Information Technology and Management, ***GPA: 3.42/4.0*** — *May 2026*
Graduate Teaching Assistant - Organization of Business Analytics Platform, 200+ students
Relevant Coursework: Database Foundations, Cloud Computing, OOP Python, System Analysis, Big Data

Vidyavardhini's College of Engineering and Technology — **Vasai, India**
Bachelor of Engineering, Information Technology, ***CGPA: 3.32/4.0*** — *May 2023*
Organizations: Deputy Head of VCET Hackathon, Member of Scholarship Committee
Relevant Coursework: Adv Data Structures and Analysis, Adv Devops, C, C++, Java, Python, Software Engineering

WORK EXPERIENCE

CauseFleet LLC — **Austin, TX**
Software Engineer — *Oct 2026 - Present*
- Gave the analytics platform a scalable donor data foundation by replacing one flat table with a core table plus 7 related and 8 lookup tables in PostgreSQL, shipped via Flyway migrations V4-V7.
- Migrated the donor service to the new schema by rewriting its Java Spring Boot layers and batch processors.
- Imported a nonprofit client's 63K donors and 42K gifts on the platform by building a 6-step RabbitMQ import, fixing duplicate-ID bugs, and replacing placeholder data across four dashboards.
- Unblocked about 60% of dashboard KPIs by analyzing client data gaps and finding 18 import-flow issues.

Ketsol Pvt Ltd — **Pune, India**
Full Stack Developer — *Jun 2023 - Dec 2024*
- Reduced recipe editing time from ~8 to 3-4 minutes on 68 PLC machines by leading a team of 4 building a tire manufacturer's Recipe Management System (Next.js, FastAPI, MySQL) with barcode-scan loading over OPC UA.
- Blocked unapproved recipes from reaching machines with an approval workflow, JWT roles and audit logs.
- Connected plant machines to live data by building OPC UA, Modbus and MQTT connectors and an InfluxDB time-series store (Python, RabbitMQ, Docker), with alerts back to operators.
- Enabled shop-floor staff to build their own reports with KMS's React drag-and-drop dashboard builder.

Database Developer — *Jan 2022 - May 2023*
- Delivered 4 pharma batch, alarm, audit and production reports (T-SQL, SSRS) with Part 11-style audit trails.
- Streamlined manual reporting by 35% via an AVEVA InTouch SCADA screen (VBScript) with a button per report.

ACADEMIC PROJECTS

Truck Analysis for Az National Trucking Link — *Dec 2025*
- Built a big-data pipeline with Hadoop HDFS, Hive and Impala over telematics and geographic data; identified high-risk drivers and city-level safety patterns to guide fleet safety work.

Insurance Management Database System Link — *May 2025*
- Designed a relational database for an insurance management system, with the complex queries, functions and procedures stored behind its business reports.

LEADERSHIP EXPERIENCE AND COMPETITIONS

UT Dallas, Digital Consulting Project (DCP) — **Richardson, TX**
Team Lead — *October 2026 - Present*
- Lead two student teams (12 members) building an AI assistant and synthetic data for CauseFleet's analytics platform.

UT Dallas Alteryx Datathon (AI Day) — **Richardson, TX**
Runner-Up — *Nov 2025*
- Placed Runner-Up by building an end-to-end workflow that ranked U.S. cities for a 3,500-employee conference by flight cost, travel time and employee proximity.

SKILLS

Languages: Java, Python, JavaScript, C, C++, SQL / T-SQL, VBScript

Backend and APIs: Spring Boot, FastAPI, Node.js, REST APIs, Microservices, JWT authentication, RabbitMQ

Frontend: React, Next.js, HTML, CSS, Flutter, Ant Design, Tailwind CSS

Databases: PostgreSQL, MySQL, SQL Server, InfluxDB, Redis, Flyway

Cloud and DevOps: AWS (EC2), Microsoft Azure, Docker, Docker Compose, Kubernetes, nginx, Git, CI/CD, systemd

Tools and Practices: Jira, Agile / Scrum, Code Review

Industrial and IoT: OPC UA, Modbus TCP, MQTT, AVEVA Wonderware InTouch SCADA, PLC Integration

Data and Reporting: Power BI, SSRS, SSIS, SSMS, Hadoop, Hive, Impala, PySpark, Alteryx

AI and Vision: YOLO, OpenCV, NVIDIA Jetson
